

## **York Region District School Board**

## Student Profile for Transition to School

York Region District School Board 9/1/2012

The Student Profile for Transition to School document may be used by school administrators and/or community partners to compile information about a student transitioning to school from Early Intervention Services (EIS), Autism Intervention Program (AIP) through the Connections for Students process, community services or from other schools when it is indicated that the student may have special needs. The Board views education as a shared responsibility and therefore, administrators may choose to convene a transition meeting with the student's parent/guardian, school staff, regional support staff and community partners to gather the information for the Student Profile. The profile will assist the administrator in determining the supports that the student requires to make a successful transition to school.
