

World Classroom Winter Packing List

Weather in Canada

Winter starts from December till February, and is cold and snowy. The average high temperature falls to -1°C in January and February and the average low is below freezing for the entire season: -4°C in December, -8°C in January and -7°C in February. The sky is often grey though this improves as the season progresses; the sun only comes out for two hours a day on average in December, three in January and four in February.
