I would like to present my candidate profile for YRDSB trustee by-election.

I have been resident of York Region for over 16 years.

As a parent of three, I have been extensively engaged with YRSDB for over 33 years (compounding school years for each child) with two teenagers still in elementary and high school.

I am a trained engineer (BSc in Civil Engineering with graduated degree in Environmental Engineering) and have been working in IT, supporting the financial industry, for over 25 years.

I see education as a fundamental and crucial discipline in society, one of utmost importance for every community member.

My candidacy for the School Board Trustee position is driven by my desire to engage and contribute more actively in further improving our YRDSB; make the learning experience better for everyone involved: students, teachers, parents, guardians and support staff.

My educational, life and parental experience would be a valuable asset to the board of trustees.

I strongly believe in a collaborative way of engaging the opportunities that lay ahead of us, especially in these unique times.

Our students deserve efficient schools, enabled teachers, a worry-free learning environment, and affordable learning tools in order to thrive and excel.

Our teachers are leaders of education, and I strongly believe that we should find more ways of unlocking the potential for the effective schooling of our children.
