

GLOBAL HEALTH MINI-MASTERS (GHMM)

Presented by

University of Toronto Schools

Masters in Education Program, Ontario Institute for Studies in Education

Postgraduate Medical Education - Global Health

Temerty Faculty of Medicine, University of Toronto

SummerUp 2021

Program Description

Program Name

Global Health Mini-Masters (GHMM)

Objective

If you wish to learn about global health issues, this SummerUp program is for you. Global health is where medicine, health policy, the public good, and a career interest in the health of communities and medicine converge.

This program will have you probing into the wide field of global health practice and health research, and how to ensure equitable health care for all peoples of the world, especially during a global pandemic. The Global Health Mini-Masters Program team consisting of members from: University of Toronto Schools, Ontario Institute for Studies in Education Master of Teaching Program and Temerty Faculty of Medicine Postgraduate Medical Education - Global Health, will lead your exploration of global health. They conceived this unique global health program for the intellectually curious student!

At the Global Health Mini-Masters Program students will:

- Learn from global health leaders who are working on big ideas in global health.
- Learn why diversity, equality, equity, diversity, and justice matter in global health.
- Work in small groups to research and develop ideas to solve a global health problem.

A list of major themes covered during the program are featured below. See the organizations working on them:

Persons with Disabilities – [World Health Organization](#)

Children's Health – [UNICEF](#) and [UNICEF Canada](#)

Women's Health – [World Health Organization](#)

LGBTQ2S+ Health – [UN Free and Equal](#)

Indigenous Communities – [Well Living House](#)

Why this Matters

Global health issues represent a local, national, and international challenge. The [Global Health Education Initiative](#) at the University of Toronto said this about global health: "Global health is a conceptual framework to understand how expressions of health and illness are impacted by underlying determinants to affect world populations. In Toronto, the most multicultural city in the world, global health is local health and local health

is global health. Global Health knowledge and skills are useful in everyday practice in Canada and are critical to solving the most challenging health problems affecting individuals and communities around the globe". If understanding this challenge matters to you, then SummerUp's Global Health Mini-Masters program is for you.

In SummerUp's Global Health Mini-Masters program, students will explore global health critical issues, hear from leaders who are working on big ideas in global health, and learn how they can become advocates for change. Additionally, students will:

- Develop research skills and learn to analyze data.
- Gain understanding of critical health challenges facing our world's people.
- Explore ways in which they may contribute to making our world better, and may adopt a global perspective and become advocates for change.
- Work in small groups to research and develop ideas to solve a global health problem.
- Learn why equality, equity, diversity and justice matter in global health.
- Gain insights into health-based career opportunities.

This Global Health Mini-Masters program will offer students a chance to work collaboratively and build peer relationships.

Admission Details

Who: You are a Black youth, Ontario resident, and are enrolled in Grades 8 to 12 during the academic year 2020-21. You are keen to advance your knowledge in medical science and to do so with other like-minded students. You have the required equipment to learn online. You are willing to commit to attending all scheduled learning sessions (see dates and times below).

Start/Stop Dates: SummerUp will offer two sections of the *Global Health Mini-Masters*

Section 1: Starts Monday, July 12 and ends Friday, July 16, 2021. This section is of one-week duration. Classes run Monday to Friday and each session begins at 9.00 a.m. and ends at 1.00 p.m. Breaks will be included.

Section 2: Starts Monday, August 9 and ends Friday, August 13, 2021. This section is of one-week duration. Classes run Monday to Friday and each session begins at 9.00 a.m. and ends at 1.00 p.m. Breaks will be included.

Meeting Pattern: Each section will meet five consecutive days (Monday to Friday) and classes will begin at 9.00 a.m. and end at 1.00 p.m., breaks included.

Mode: Online. Students must have a suitable computer device and internet access.

Admission: To be considered for admission, candidates must attend a program orientation at 6.30 p.m., Tuesday, June 29, 2021. This orientation will be co-hosted by the Leadership by Design program and University of Toronto Schools.

Register for the orientation using the following

A number of organizations collaborate to deliver the Global Health Mini-Masters program.

University of Toronto Schools (UTS) Team:

-Sharon Zimmer, Director, Outreach Programs and Community Engagement

-Rosemary Evans, Principal

-Charline Wan, Student Success Lead

Ontario Institute for Studies in Education (OISE) Team for 2021 (TBC)

-Master of Teaching (MT) Intermediate/Senior Education students

The Master of Teaching Program is an intensive teacher education program designed for people who are looking to become exceptional teachers. The program is committed to excellence and the preparation of the next generation of educational leaders.

Teacher Candidates take part in a research project that connects real experiences and theory to explore educational practice and curriculum.

Postgraduate Medical Education (PGME) – Global Health:

-PGME's Global Health initiatives reflect local and global social responsibility and accountability, supporting PGME medical residents and fellows towards contribution and leadership in global health education, research and practice.

-The Global Health Education Initiative (GHEI), led by Post Graduate Medical Education, is an exciting initiative which fills a long-recognized gap in the training of health professionals who are interested in addressing the needs of marginalized populations at home, and underserved populations abroad.

PGME Global Health Mini-Masters Team:

-Alex Aguilera, BSc, GHEI Assistant

-Shveta Bhasker, BSc, GHEI Assistant

-Delaney Hines, MPH, Acting Project Manager, Equity, Inclusion, Diversity, and Anti-Racism, Ontario Health, & GHMM Lead

-Judy Kopelow, PGME Global Health

-Dr. Barry Pakes, PGME Global Health

PGME Global Health Mini-Masters Faculty for Summer 2021 (TBC)

The SummerUp program is funded by the Ontario Ministry of Education
