

# No parent should have to stand alone as they advocate for their children!

Parents of Black Children is working to change that through our Education System Navigator.

## What is a System Navigator?

Our System Navigation pilot project is designed to stand beside you as you 'navigate' the system.

The Navigator will support families as they interact with their child's school and/or school board by attending meetings, providing advice and helping to eliminate barriers for the family in understanding how the education system works in Ontario. They will act as a neutral third party, outside of the system, who can express the unique needs and challenges faced by African Canadian families engaged with the education system.

## When should you contact the Education System Navigator?

Think... SAFE!

**S** **Support** and consultation when you are experiencing challenges within the education system

**A** **Advocacy** and Africentric wrap around for parents of Black children experiencing concerns in the education system. (This includes children who have 1 Black parent)

**F** **Free** - Education is a human right and an equitable education is guaranteed in the UN Convention on the Rights of the Child. We will never charge you for our support and services

**E** **Enable** finding the right support, unpacking of anti-Black racism and help dealing with school administration, teachers and board staff for parents of Black children.
