Yellowfish Road

The Yellow Fish Road program was developed by Trout Unlimited Canada. This program includes an interactive presentation about storm water pollution that shows how storm drains are linked to local water bodies without any purification. Students then go outside to paint local storm drains with yellow fish symbols and distribute educational leaflets to homes in the neighbourhood.

Last week, KCSS student volunteers participated in the Yellow Fish Road program. They marked 163 storm drains and delivered 501 flyers. Thank you to the students and their teacher supervisors. Your hard work is an essential part of keeping our aquatic habitats healthy!
