Format tips specific to the list of References in APA format:

- Use only the initial of the author's first name, not the full name, include up to 20 authors.
- If there is no individual author, use a group author e.g. National Film Board.
- Put the date in brackets after the author's name. If there is no author, the date follows the title.
- Titles are written *initials*, unless it is the title of an article, web page, or chapter of a book, (i.e. a portion of a larger work) which is written in regular font. This includes regular font for web pages and italics for web sites.
- Only the first word of a title and/or sub-title is capitalized (except for proper nouns like names of people, places, and organizations that are always capitalized). **Periodical titles are always capitalized** (i.e. magazines, newspapers, and journals).
- Put a period at the end of each entry unless it is a website address.
- No longer need publisher location or Retrieved from.

Format tips for all References/Works Cited lists:

- The list begins on a new page at the end of your research paper or essay.
- The title should be the same size font as the list. It should be centred. Do not underline or bold it.
- Double-space your list.
- If a citation is longer than one line, start the first line of each reference at the left margin; indent all subsequent lines 5 spaces. To do this in Word, highlight your list, select "Format", then "Paragraph", then under "Special" select "Hanging", and click OK. This will format your entire list.
- Entries should be arranged alphabetically by the authors' family names. If no author or editor is available, list a print source by the title of the work, and an internet source by the name of the organization/institution. In both cases, alphabetize by the first word *that is not "an", "a", or "the"*.
