

## Problem of the Week

### Problem A

### Fair Share

A class wins a pizza party for reading the most books in September. There are 28 students in the class and each student will get 2 slices of pizza. Each pizza has 6 slices.

- A) How many pizzas will the school need to buy so that each student can have 2 slices?

Show your thinking.

- B) Will there be any slices left over? If so, how many?
