

September & October Value: Relationships

We value positive, meaningful relationships with all of our school community. We value different ideas, and conversations where all voices are heard.

RELATIONSHIPS WITH **LEARNERS** - interests, strengths, & needs

We build positive relationships when:

- we understand our own learning interests and we share our interests with teachers and classmates
- we understand our own strengths and needs as a learner and we advocate or ask for help from teachers or classmates when needed

We value different ideas when:

- we understand other points of view or perspectives

We make sure all voices are heard when:

- we encourage others to share their thinking

RELATIONSHIPS IN **LEARNING** - communication, collaboration, & problem-solving

We build positive relationships when:

- we are open to working with others

We value different ideas when:

- we work to solve problems in learning, and in the playground

We make sure all voices are heard when:

- we ask questions and are curious about learning
- we respectfully disagree

RELATIONSHIPS IN OUR **ENVIRONMENT** - safe & inclusive space

We build positive relationships when:

- we say hello, good morning to the people in our environment
- we respect our school (indoor and outdoor spaces)

We value different ideas when:

- we invite others to play or join a group activity
- we ask questions when we don't understand

We make sure all voices are heard when:

- we respect and listen to the opinions of others
