Student of the Week:

Congratulations to Emma Baldock for being chosen as this week's "Student of the Week". Well done!

Information about the Ontario Secondary Literacy Test

This year's Ontario Secondary School Literacy Test (OSSLT) will be written on **Thursday, March 30th, 2017**. The test will be written in the morning in two 75 minute sessions, with a 15-minute break in between booklets. The school day has been adjusted so that only students who are writing the test are in the building during the morning. The modified timetable then allows for every student to attend all four shortened periods in the afternoon. The modified timetable will be shared next month.

All students writing this year's OSSLT will attend an orientation session in the lecture theatre during period 3 on February 28th, or March 1st (depending on which class they are in). This orientation session will introduce all students writing this year to the format of the test, the requirements of the test, and some tips for success in writing the test. Each student will be given an orientation booklet to refer to, which also includes information on how to access practice materials on-line at www.eqao.com. Students requiring accommodations for the OSSLT are continuing to work with the Special Education department to ensure that these are implemented on the day of the test.

In preparation for the literacy test, all Grade 9 and 10 courses have been incorporating the explicit teaching and use of OSSLT tasks and strategies into the curriculum so that all students have various opportunities to practice each of the tasks in a variety of subject areas.

In addition, all students who are writing the OSSLT this year are invited to attend a series of Lunch n' Learns in room 325 to practice the various tasks that they will see during this year's literacy test. During each of the sessions, students will complete one OSSLT task and self-assess the task using the scoring tools that are appropriate to each task. The schedule of these sessions is listed below:

March 6 th	March 7 th	March 8 th	March 9 th	March 10 th

NON-BOARD GRADUATION ACTIVITIES: SAFETY ADVISORY

Every year, there are individuals/businesses that seek to recruit students for ticketed trips or parties at local or international destinations. The York Region District School Board and Sutton District High School, do **not** support, promote or endorse any form of involvement in these activities. This advisory is being shared in the interest of students' personal safety.

Allergies/Medical Conditions

There are students and staff members in our school who have life-threatening allergies to nuts and other allergens. If they smell or come into contact with these foods, they may have an anaphylactic reaction.

To help create an allergen-safe environment, do not bring nut or nut products (especially peanut products), or sprays with odour (such as perfume or colognes) to school.

If your child has a serious or life-threatening allergy or medical condition, let the school know immediately and speak to the school office about completing the appropriate medical forms. There are students in our school who have a life-threatening allergy to nuts and other allergens. If they smell or come into contact with these foods, they may have an anaphylactic reaction.

We request that staff and students refrain from bringing peanut products into the building. Peanut products are not sold in our school vending machines or cafeteria. Please inform the school, if your son or daughter has any allergies. Care and caution must be used when eating outside the cafeteria. Additional items may be restricted based on information that we receive throughout the year.

Many students and staff members are highly sensitive to perfumes, colognes, aftershaves and other scented products. By choosing to use unscented personal care products, we can make Sutton District High School a better place for all of us to learn and work.

Eco Tip

Did you know?

- it is estimated that it takes around 3.4 mega joules of energy to make a typical one-litre plastic bottle, cap, and packaging.
- the manufacture of every ton of the plastic used in water bottles produces around 3 tons of carbon dioxide.
- in addition to the water sold in plastic bottles, it is estimated that twice as much water is used in the production process. Thus, every litre sold represents three litres of water.
- it is estimated to take 450 years for a plastic water bottle to decompose.

Use a reusable water bottle to reduce your eco-footprint!
